STREAMLINE SL RECESSED

Quality of life has a profile

Streamline SL recessed

Convincing design and function

Deep glazing rebate permits the use of all commercially available glazing.

Large-dimensioned steel reinforcements guarantee high stability.

Classically elegant look with soft edges.

Reduced energy costs, greater quality of living. A 5-chamber profile system and 2 continuous seals provide long-lasting, optimum thermal insulation and noise protection.

Weather-proof and unbeatably easy to clean thanks to brand name vinyl with a highly dense surface structure.

High-quality foil coating offers a wide selection of colours. Available in many standard colours and decors, and in custom RAL colours upon request.

Design living spaces with Streamline SL. Not only is the distinctive design of this profile system impressive, it also has state of the art window technology, which significantly enhances comfort of living and reduces energy consumption. The 5-chamber system, with a construction depth of 76 mm and large-dimensioned steel reinforcement, ensures stability and excellent thermal insulation. The factory-integrated dual seal system won't give noise and cold a chance. A highly

dense surface structure makes Streamline SL extremely weather-proof and easy to clean.

Areas of application: Side and bottom hung windows, tilt-and turn and horizontal pivot windows, folding and tilt-and-slide doors, entrance doors

Technical specifications: $U_f=1.3 \text{ W/m}^2\text{K}$
Sound protection up to 47 dB. Burglary resistance class 2*

*Resistance class 2 acc. to DIN V ENV 1627
